

Finest Quality, Competitively Priced Laryngeal Masks by Merlyn Medical

EndoMask® was designed to conform to the natural contours of the hypopharynx for perfect fit, allowing rapid, blind insertion and single-hand ventilation.

EndoMask® Facts and Features

- **Superior cuffs** are thick and durable with a soft matte finish to prevent sticking to tissues.
- **The connection between the cuff and tube body** is extremely smooth to reduce trauma.
- The deep cuff bowl protects tissues and eliminates the need for epiglottic (aperture) bar obstructions, allowing easy access for fiber optic scopes, suction catheters, or tracheal tubes. Cleaning (EndoMask Elite) is faster, easier, and more thorough.
- **Quality inflation lines** with self-sealing pilot balloons are embedded in the tube bodies and Universal 15mm connectors assure secure attachment to ventilator circuits.
- **Premium-grade materials** are reflected by the clarity of both the EndoMask Elite™ and EndoMask Essential™ tube bodies. Clearer tubes make universal markings sharper, easier to read and make blood and debris easy to spot so immediate action can be taken.
- **100% Latex-Free** manufacture and packaging.
- **Meticulous manufacture** of EndoMask® is under the strictest international GMP standards, overseen by Merlyn Medical's Director of Manufacturing and his staff for consistency and quality control. EndoMask® has received FDA, CE mark, ISO, and Japanese Ministry of Health certifications and approvals.
- **Available** in sizes 1, 1.5, 2, 2.5, 3, 4 and 5. Packaged sterile.

EndoMask Elite™ - Reusable Silicone

EndoMask Elite™ can be cleaned, steam autoclaved, and reused with confidence 40 times. A tracking card is included in each package to provide a handy format to record sterilization history. The absence of epiglottic bars makes cleaning EndoMask Elite™ easy and thorough.

EndoMask Essential™ - Single Use PVC

EndoMask Essential™ is packaged sterile and designed for single-use disposability, guaranteeing superior contamination control. Merlyn Medical's exclusive Clearascent™ tube exemplifies the fine quality of medical-grade PVC used and makes any debris quick and easy to spot.

ENDOTUBE™

Precision-Manufactured Tracheal Tubes by Merlyn Medical

EndoTube® Facts and Features

- Soft-rounded distal tip
- Magill curve, Universal 15 mm connector, full-length radiopaque line
- Crystal-clear PVC makes insertion markings easy to read
- High volume/low pressure cuff, elongated to equalize and reduce pressure against tracheal tissue, assuring excellent seal, which may also help prevent VAP (cuff styles)
- Quality pilot balloon with self-sealing valve (cuff styles)
- Manufactured under the strictest international GMP standards EndoTube™ has received FDA, CE mark, ISO, and Japanese Ministry of Health certifications and approvals.
- 100% Latex-Free manufacturer and packaging

EndoTube™ Standard Oral / Nasal Cuffed and Uncuffed Available in boxes of 10

Cuffed sizes and half sizes 3.0 to 8.5
Uncuffed sizes and half sizes 3.0 to 6.0

EndoTube™ Preformed Oral Cuffed and UnCuffed Available in boxes of 10

Cuffed sizes and half sizes 3.5 to 8.0
Uncuffed sizes and half sizes 3.0 to 6.0

EndoTube™ Preformed Nasal Cuffed and UnCuffed Available in boxes of 10

Cuffed sizes and half sizes 3.5 to 7
Uncuffed sizes and half sizes 3.0 to 6.0
