

The Next Evolution in Magnetic Drilling!

Superior magnetic performance on a wide range of steel - flat or curved surfaces!

FEATURES & BENEFITS

Magswitch patented technology now with a powerful patent-pending pivoting base!

- The Disruptor 30 switchable magnetic base requires no electricity for a controlled powerful hold on a wide range of steel thicknesses - thick to thin!
- No disruption of magnetic grip due to unintentional power loss means huge increase in safety for operators
- Unique flexible features for pipes of various sizes
- Magnets in base pivot to accommodate flat and curved surfaces without the need for special attachments
- Partial magnetic actuation takes the weight of the tool off the operator and allows for fine control and positioning
- Magnet turns completely OFF
- Drill position is centered to enhance Magswitch's powerful technology for optimum performance
- Swings away for hole inspection & debris removal without losing position

Part #8100920
